

# 5 Port Solenoid Valve

## VQ1000/2000 Series

Metal Seal

Rubber Seal

The EX510 series is to be discontinued. When designing new equipment and facilities, consider using another series (EX260/EX600) instead.

The connection cable and various units for PLC connection in PC wiring systems have been discontinued by the manufacturer. Therefore, while they can no longer be provided, the valve manifold (manifold with built-in valves) can still be ordered. For details, refer to the [Web Catalog](#).

### Power saving

Standard: **0.4 w**

(Reduced by **60%** compared to current model)

High-pressure (1 MPa, Metal seal): **0.95 w**

# 5 Port Solenoid Valve VQ Series

## Space-saving profile

All pilot valves are compactly mounted on one side. The space-saving design of mounting all fittings on one side permits mounting in three directions.

## The non-bias, one-clamp structure permits easy valve replacement.

## Built-in One-touch fittings for easy piping

## Slide locking type manual override provided

ON/OFF operation and locking can be made by sliding the manual override.

\* VQ1000

## Thin compact design with high flow capacity

Model	Manifold pitch (mm)	Flow rate characteristics		Applicable cylinder bore size
		Metal seal	Rubber seal	
		C [dm <sup>3</sup> /(s·bar)]	C [dm <sup>3</sup> /(s·bar)]	
VQ1000	10.5	0.72	1.0	Up to ø50
VQ2000	16	2.6	3.2	Up to ø80

\* Flow rate characteristics: 4/2 → 5/3 (A/B → R1/R2)

## A wide variety of optional parts

\* The photo does not show an actual use example.

### Regulator unit

This regulator adjusts the SUP pressure of a manifold and reduces the supply pressure from the D-side SUP port.

### Slide locking type (Manual)

#### Locking type (Manual)

#### Ejector unit

It is possible to mount an ejector on the manifold together with the solenoid valve. Reduced wiring and space saving.

#### Blanking plate assembly

#### Direct EXH outlet with built-in silencer

#### Port plug

#### Individual SUP spacer

#### Individual EXH spacer

#### DIN rail

#### Dual flow fitting

This fitting can double the flow rate by consolidating the outputs of the valves of two stations. It is used for operating cylinders with large bore size.

#### Elbow fitting assembly bottom ported

#### Elbow fitting assembly top ported

# Cylinder Speed Chart

This chart is provided as guidelines only.  
For performance under various conditions, use SMC's Model Selection Program before making a judgment.

\* It is when the cylinder is extending that is meter-out controlled by speed controller which is directly connected with cylinder, and its needle valve with being fully open.

\* The average velocity of the cylinder is what the stroke is divided by the total stroke time.

\* Load factor: ((Load mass x 9.8)/Theoretical force) x 100%

## Conditions

### How to Order Manifold

### Cylinder port

Symbol	Port size	Symbol	Port size
C3	With ø3.2 One-touch fitting	L5	Top ported elbow M5 thread
C4	With ø4 One-touch fitting	B3	Bottom ported elbow with ø3.2 One-touch fitting
C6	With ø6 One-touch fitting	B4	Bottom ported elbow with ø4 One-touch fitting
M5	M5 thread	B6	Bottom ported elbow with ø6 One-touch fitting
CM Note 1)	Mixed sizes and with port plug	B5	Bottom ported elbow M5 thread
L3	Top ported elbow with ø3.2 One-touch fitting	LM Note 1)	Elbow port, mixed sizes (Including upward, downward piping and mixed)
L4	Top ported elbow with ø4 One-touch fitting	MM Note 2)	Mixed size for different types of piping, option installed
L6	Top ported elbow with ø6 One-touch fitting		

- Note 1) Indicate "Mixed sizes and with port plug" by means of the manifold specification sheet.  
 Note 2) When selecting the mixed size for different types of piping or dual flow fitting assembly, enter "MM" and give instructions in the manifold specification sheet.  
 Note 3) Inch-size One-touch fittings are also available. Refer to page 406 for details.  
 Note 4) M5 fittings for M5 thread are attached without being incorporated.

Simple specials are available with SMC Simple Specials System. Please contact your local representative for more details.

- Note 1) When multiple symbols are specified, indicate them by letter in the order that they appear in the table, starting from the top. Example: -BRS  
 Note 2) Models with a suffix "-B" have check valves for prevention of back pressure at all manifold stations. When a back pressure check valve is desired, and is to be installed only in certain manifold stations, specify the mounting position by means of the manifold specification sheet.  
 Note 3) Specify the mounting position by means of the manifold specification sheet.  
 Note 4) Refer to page 418 for details on with vacuum ejector unit. A combination of "J" and "N" is not available.  
 Note 5) Specify the wiring specifications by means of the manifold specification sheet. (Except L kit)  
 Note 6) Indicate "R" for the valve with external pilot.  
 Note 7) □: Station. Example: D08. The number of stations that may be displayed is longer than the manifold number of stations.  
 Note 8) G1, G2, or G3 cannot be combined with N.  
 Note 9) When mounting the blanking plate with connector and the slide locking manual type valve by ordering only the manifold, order the name plate separately. For details, refer to page 415.

Series  
1 VQ1000

### Type of actuation

1	2-position single (A)4 (B)3 (R)1.5 (S)3(R2) (F)
2	Metal 2-position double (A)4 (B)3 (R)1.5 (S)3(R2) (F)
	Rubber 2-position double (A)4 (B)3 (R)1.5 (S)3(R2) (F)
3	3-position closed center (A)4 (B)3 (R)1.5 (S)3(R2) (F)
4	3-position exhaust center (A)4 (B)3 (R)1.5 (S)3(R2) (F)
5	3-position pressure center (A)4 (B)3 (R)1.5 (S)3(R2) (F)
A Note 4)	4-position dual 3-port valve (A)4 (B)3 (S)1.5 (F)1 (R)1 (S)2
	4-position dual 3-port valve (B) Note 4)
	4-position dual 3-port valve (C) Note 4)

Note) Rubber seal only

### Seal

0	Metal seal
1	Rubber seal

### Function

Symbol	Specifications	DC	AC
Nil	Standard	(0.4 W) ○ (Note 1)	○ (Note 1)
B	High-speed response type	(0.95 W) ○	—
K Note 2)	High-pressure type (1.0 MPa)	(0.95 W) ○	—
N Note 3)	Negative common	○	—
R Note 3) Note 5)	External pilot	○	○

Note 1) Refer to page 375 for power consumption of AC type.

Note 2) Metal seal only

Note 3) For external pilot and negative common specifications, refer to "Semi-standard" on pages 405 and 406.

Note 4) When two or more symbols are specified, indicate them alphabetically. Combination of [B] and [K] is not possible.

Note 5) Dual 3-port valve is not applicable.

### CE/UKCA-compliant

Nil	—
Q	CE/UKCA-compliant

Note) For CE/UKCA-compliant models, DC-type only.

### Manual override

Nil: Non-locking push type (Tool required)	B: Locking type (Tool required)
C: Locking type (Manual)	D: Slide locking type (Manual)

### Light/surge voltage suppressor

Nil	Yes
E Note 1, 2)	None (Non-polar)

Note 1) Not applicable to the S kit.

Note 2) A combination of "Function [N] (Negative common)" and [E] is unavailable.

Since [E] has no polarity, it can also be used as a negative common. Selection of "Function [N]" is not required.

### Coil voltage

		CE/UKCA-compliant
1	100 VAC (50/60 Hz)	—
2 Note)	200 VAC (50/60 Hz)	—
3	110 VAC (50/60 Hz)	—
4 Note)	220 VAC (50/60 Hz)	—
5	24 VDC	●
6	12 VDC	●

Note) 200 and 220 VAC: F/L kit only

### Example

VV5Q11-09C6FU2 ... 1 set (F kit 9-station manifold base part no.)  
 \*VQ1100-51 ... 4 sets (Single solenoid part no.)  
 \*VQ1200-51 ... 4 sets (Double solenoid part no.)  
 \*VVQ1000-10A-1 ... 1 set (Blanking plate part no.)

The asterisk denotes the symbol for assembly.  
 Prefix it to the part nos. of the solenoid valve, etc.

Specify the part numbers for valves and options together beneath the manifold base part number. Besides, when the arrangement will be complicated, specify them by means of the manifold specification sheet.

## Caution

Use the standard (DC) specification when continuously energizing for long periods of time.

Note 1) Not applicable to the S kit.  
Note 2) A combination of "Function [N] (Negative common)" and [E] is unavailable.  
Since [E] has no polarity, it can also be used as a negative common. Selection of "Function [N]" is not required.

Coil voltage

		CE/UKCA-Compliant
1	100 VAC (50/60 Hz)	—
2 Note)	200 VAC (50/60 Hz)	—
3	110 VAC (50/60 Hz)	—
4 Note)	220 VAC (50/60 Hz)	—
5	24 VDC	●
6	12 VDC	●

Note) 200 and 220 VAC: F/L kit only

Function

Symbol	Specifications	DC	AC
Nil	Standard	(0.4 W) ○	○ Note 1)
B	High-speed response type	(0.95 W) ○	—
K Note 2)	High-pressure type (1.0 MPa)	(0.95 W) ○	—
N Note 3)	Negative common	○	—
R Note 3) Note 5)	External pilot	○	○

Note 1) For power consumption of AC type, refer to page 375.  
Note 2) Metal seal only  
Note 3) For external pilot and negative common specifications, refer to "Semi-standard" on pages 405 and 406.  
Note 4) When two or more symbols are specified, indicate them alphabetically. Combination of [B] and [K] is not possible.  
Note 5) Dual 3-port valve is not applicable.

Example

VV5Q21-08C8FU2 1 set (F kit 8-station manifold base part no.)  
\*VQ2100-51 ..... 3 sets (Single solenoid part no.)  
\*VQ2200-51 ..... 4 sets (Double solenoid part no.)  
\*VVQ2000-10A-1 ..... 1 set (Blanking plate part no.)

The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

Specify the part numbers for valves and options together beneath the manifold base part number. Besides, when the arrangement will be complicated, specify them by means of the manifold specification sheet.

Manual override

Nil: Non-locking push type (Tool required)

B: Push-locking slotted type (Tool required)

C: Locking type (Manual)

D: Slide locking type (Manual)

Caution

Use the standard (DC) specification when continuously energizing for long periods of time.

Note 1) The values are given for port size C6: (VQ1000), C8: (VQ2000) without back pressure check valve.

Note 2) As per JIS B 8419: 2010 (Supply pressure 0.5 MPa: with indicator light/surge voltage suppressor; clean air

The response time is subject to the pressure and quality of the air.) The values at the time of ON are given for double types.

Symbol

Note) Rubber seal only

Standard Specifications

Valve specifications	Valve type	Metal seal	Rubber seal	
	Fluid	Air		
	Maximum operating pressure	0.7 MPa (High-pressure type: 1.0 MPa)		
	Minimum operating pressure	Single	0.1 MPa	0.15 MPa
		Double	0.1 MPa	0.1 MPa
		3-position	0.1 MPa	0.2 MPa
		4-position	—	0.15 MPa
Ambient and fluid temperature	-10 to 50°C (Note 1)			
Lubrication	Not required			
Manual override	Push type, Locking type (Tool required, Manual) semi-standard			
Impact/Vibration resistance (Note 2)	150/30 m/s <sup>2</sup>			
Enclosure	Dust-protected; Dust-tight, Water-jet-proof (IP65) (Note 4)			
Electrical specifications	Coil rated voltage	12, 24 VDC, 100, 110, 200, 220 VAC (50/60 Hz)		
	Allowable voltage fluctuation	±10% of rated voltage		
	Coil insulation type	Equivalent to Class B		
	Power consumption (Current)	24 VDC	0.4 W DC (17 mA), 0.95 W DC (40 mA) (Note 3)	
		12 VDC	0.4 W DC (34 mA), 0.95 W DC (80 mA) (Note 3)	
		100 VAC	Inrush 0.96 VA (10 mA), Holding 0.96 VA (10 mA)	
		110 VAC	Inrush 1.0 VA (9 mA), Holding 1.0 VA (9 mA)	
200 VAC		Inrush 1.26 VA (6 mA), Holding 1.26 VA (6 mA)		
220 VAC	Inrush 1.38 VA (6 mA), Holding 1.38 VA (6 mA)			

Note 1) Use dry air to prevent condensation when operating at low temperatures.

Note 2) Impact resistance ..... No malfunction occurred when it is tested in the axial direction and at the right angles to the main valve and armature in both energized and de-energized states every once for each condition. (Values at the initial period)

Vibration resistance ... No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energized and de-energized states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)

Note 3) Value for high-speed response, high-voltage type (0.95 W)

Note 4) Dust-tight, water-jet-proof (IP65) is available on T/L/S/M kit of the VQ2000.

VV5Q21

# F VQ1000/2000 Series Kit (D-sub connector)

- D-sub connector reduces installation labor for electrical connections.
- Using the D-sub connector (25P), (15P as semi-standard) conforming to MIL standard permits the use of connectors put on the market and gives a wide interchangeability.
- Top or side receptacle position can be selected in accordance with the available mounting space.
- Maximum stations are 24.

## Manifold Specifications

Series	Piping specifications			Applicable stations
	Piping direction	Port size		
VQ1000	Side	1 (P), 3(R)	4(A), 2(B)	Max. 24 stations
VQ2000	Side	C10	C4, C6, C8	Max. 24 stations

## D-sub Connector (25 Pins)

## Cable Assembly ●

015  
AXT100-DS25-030  
050

(The D-sub connector cable assembly can be ordered individually or included in a specific manifold model no. Refer to "How to Order Manifold.")

Multi-core vinyl cable  
0.3 mm<sup>2</sup> x 25 cores

SMC

2 x M2.6 x 0.45

Socket side

Terminal no.

**D-sub connector cable assembly**

Cable length (L)	Assembly part no.	Note
1.5 m	AXT100-DS25-015	Cable 25 cores x 24AWG
3 m	AXT100-DS25-030	
5 m	AXT100-DS25-050	

- \* For other commercial connectors, use a 25 pins type with female connector conforming to MIL-C-24308.
- \* Cannot be used for transfer wiring.

**Connector manufacturers' example**

- Fujitsu Limited
- Japan Aviation Electronics Industry, Limited
- J.S.T. Mfg. Co., Ltd.
- HIROSE ELECTRIC CO., LTD.

Note 1) Types with 15 pins are also available. Refer to page 404 for details.  
Note 2) Lengths other than the above are also available. Please contact SMC for details.

## Electrical characteristics

Item	Property
Conductor resistance Ω/km, 20°C	65 or less
Voltage limit V, 1 min, AC	1000
Insulation resistance MΩ/km, 20°C	5 or more

Note) The min. bending radius of the D-sub connector cable assembly is 20 mm.

## Wire color by terminal no. of D-sub connector cable assembly

Note) Refer to page 405 for details.

- Note 1) Insert "L" (Top ported) or "B" (Bottom ported) for elbow type.  
Example) B6 (Bottom ported elbow with ø6 One-touch fitting)
- Note 2) Indicate "LM" (Including upward, downward piping and mixed) for models with elbow fittings and mixed cylinder port sizes.
- Note 3) Indicate "Mixed sizes and with port plug" by means of the manifold specification sheet.
- Note 4) When selecting the mixed size for different types of piping, dual flow fitting assembly, or double check block (direct mounting), enter "MM" and give instructions in the manifold specification sheet.
- Note 5) Inch-size One-touch fittings are available. Refer to "Semi-standard" on page 406 for details.

- Note 1) When two or more symbols are specified, indicate them alphabetically. Example) -BRS
- Note 2) Models with a suffix "-B" have check valves for prevention of back pressure at all manifold stations. When a back pressure check valve is desired, and is to be installed only in certain manifold stations, specify the mounting position by means of the manifold specification sheet.
- Note 3) The number of stations that may be displayed is longer than the manifold number of stations.
- Note 4) Specify the mounting position by means of the manifold specification sheet.
- Note 5) Refer to page 418 for the details on with ejector unit. A combination of "J" and "N" is not available.
- Note 6) Specify the wiring specifications by means of the manifold specification sheet.
- Note 7) Indicate "R" for the valve with external pilot.
- Note 8) G1, G2, or G3 cannot be combined with N.

Electrical Wiring Specifications

**D-sub connector**

As the standard electrical wiring specifications, double wiring (connected to SOL. A and SOL. B) is adopted for the internal wiring of each station for 12 stations or less, regardless of valve and option types. Mixed single and double wiring is available as semi-standard. Refer to page 405 for details.

Note) When using the negative common specifications, use valves for negative common. (Refer to page 405.) Refer to "Semi-standard" on page 405 for details.

**Caution**  
Use the standard (DC) specification when continuously energizing for long periods of time.

How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

**<Example>**  
D-sub connector kit with cable (3 m)  
VV5Q11-09C6FU2 -1 1 set-Manifold base part no.  
\*VQ1100-51 ..... 2 sets-Valve part no. (Stations 1 to 2)  
\*VQ1200-51 ..... 4 sets-Valve part no. (Stations 3 to 6)  
\*VQ1300-51 ..... 2 sets-Valve part no. (Stations 7 to 8)  
\*VVQ1000-10A-1 ..... 1 set-Blanking plate part no. (Station 9)

Prefix the asterisk to the part nos. of the solenoid valve, etc.

Write sequentially from the 1st station on the D-side. When part nos. written collectively are complicated, specify them by means of the manifold specification sheet.

# F VQ1000/2000 Series

Formula L1 = 10.5n + 44.5, L2 = 10.5n + 62.5 n: Station (Maximum 24 stations)

L	n	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24
<b>L1</b>		65.5	76	86.5	97	107.5	118	128.5	139	149.5	160	170.5	181	191.5	202	212.5	223	233.5	244	254.5	265	275.5	286	296.5
<b>L2</b>		83.5	94	104.5	115	125.5	136	146.5	157	167.5	178	188.5	199	209.5	220	230.5	241	251.5	262	272.5	283	293.5	304	314.5
<b>(L3)</b>		112.5	125	125	137.5	150	162.5	175	187.5	187.5	200	212.5	225	237.5	250	250	262.5	275	287.5	300	312.5	325	325	337.5
<b>(L4)</b>		123	135.5	135.5	148	160.5	173	185.5	198	198	210.5	223	235.5	248	260.5	260.5	273	285.5	298	310.5	323	335.5	335.5	348

With ejector unit: Formula L1 = 10.5n + 28.7 + (Number of ejector units x 26.7)  
L2 = 10.5n + 46.3 + (Number of ejector units x 26.7)  
L4 is L2 plus about 30.

# P VQ1000/2000 Series Kit (Flat ribbon cable)

- MIL flat ribbon cable connector reduces installation labor for electrical connection.
- Using the connector for flat ribbon cable (26P) conforming to MIL standard permits the use of connectors put on the market and gives a wide interchangeability.
- Top or side receptacle position can be selected in accordance with the available mounting space.
- Maximum stations are 24.

## Manifold Specifications

Series	Piping specifications		Applicable stations
	Piping direction	Port size	
VQ1000	Side	C8 C3, C4, C6, M5	Max. 24 stations
VQ2000	Side	C10 C4, C6, C8	Max. 24 stations

## Flat Ribbon Cable (26 Pins)

**AXT100-FC26-1<sup>1</sup>**  
(Flat ribbon cable connector assembly can be ordered individually or included in a specific manifold model no. Refer to "How to Order Manifold.")

**Flat Ribbon Cable Connector Assembly**

Cable length (L)	Assembly part no.	Note
1.5 m	AXT100-FC26-1	Cable 26 cores x 28AWG
3 m	AXT100-FC26-2	
5 m	AXT100-FC26-3	

\* For other commercial connectors, use a 26 pins type with strain relief conforming to MIL-C-83503.  
\* Cannot be used for transfer wiring.

**Connector manufacturers' example**

- HIROSE ELECTRIC CO., LTD.
- Fujitsu Limited
- J.S.T. Mfg. Co., Ltd.
- 3M Japan Limited
- Japan Aviation Electronics Industry, Limited
- Oki Electric Cable Co., Ltd.

Note 1) Other than the above model, 10P, 16P, 20P are also available. Refer to page 404 for details.  
Note 2) Lengths other than the above are also available. Please contact SMC for details.

## Cable Assembly

The total number of stations is tabulated starting from one on the D-side.

## How to Order Manifold

Note) For CE/UKCA-compliant models, DC-type only.

**VV5Q 1 1 - 08 C6 P U 1 -**

**Series**

1	VQ1000
2	VQ2000

**Manifold**

1	Plug-in unit

	COM. 26	(+)	(-)

Electrical wiring specifications

Positive COM spec.      Negative COM spec. (Note)

As the standard electrical wiring specifications, double wiring (connected to SOL. A and SOL. B) is adopted for the internal wiring of each station for 12 stations or less, regardless of valve and option types. Mixed single and double wiring is available as semi-standard. Refer to page 405 for details.

Note) When using the negative common specifications, use valves for negative common. (Refer to page 405)  
Refer to "Semi-standard" on page 405 for details.

How to Order Valves

Note) For CE/UKCA-compliant models, DC-type only.

How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

<Example>

- Flat ribbon cable kit with cable (3 m)
- VV5Q11-09C6PU2 ... 1 set—Manifold base part no.
- VQ1100-51 ... 2 sets—Valve part no. (Stations 1 to 2)
  - VQ1200-51 ... 4 sets—Valve part no. (Stations 3 to 6)
  - VQ1300-51 ... 2 sets—Valve part no. (Stations 7 to 8)
  - VVQ1000-10A-1 ... 1 set—Blanking plate part no. (Station 9)

Prefix the asterisk to the part nos. of the solenoid valve, etc.

Write sequentially from the 1st station on the D-side. When part nos. written collectively are complicated, specify them by means of the manifold specification sheet.

**Series**

1	VQ1000
2	VQ2000

**Seal**

0	Metal seal
1	Rubber seal

**CE/UKCA-compliant**

Nil	—
Q	CE/UKCA-compliant

Note) For CE/UKCA-compliant models, DC-type only.

**Type of actuation**

1	2-position single
2	2-position double
3	3-position closed center
4	3-position exhaust center
5	3-position pressure center
A	4-position dual port (N.C. +N.C.)
B	4-position dual port (N.O. +N.O.)
C	4-position dual port (N.C. +N.O.)

**Function**

Symbol	Specifications	DC	AC
Nil	Standard (0.4 W)	○ (Note 1)	○
B	High-speed response type (0.95 W)	○	—
K Note 2)	High-pressure type (1.0 MPa) (0.95 W)	○	—
N Note 3)	Negative common	○	—
R Note 5) Note 5)	External pilot	○	○

**Manual override**

Nil	Non-locking push type (Tool required)
B	Locking type (Tool required)
C	Locking type (Manual)
D	Slide locking type (Manual)

**Light/Surge voltage suppressor**

Nil	Yes
E Note)	None (Non-polar)

Note) A combination of "Function [N] (Negative common)" and [E] is unavailable. Since [E] has no polarity, it can also be used as a negative common. Selection of "Function [N]" is not required.

**Coil voltage**

	CE/UKCA-compliant
1	100 VAC (50/60 Hz) —
3	110 VAC (50/60 Hz) —
5	24 VDC ●
6	12 VDC ●

**Caution**  
Use the standard (DC) specification when continuously energizing for long periods of time.

Note 1) Refer to page 375 for power consumption of AC type.  
Note 2) Metal seal only.  
Note 3) Refer to "Semi-standard" on pages 405 and 406 for external pilot and negative common specifications.  
Note 4) When two or more symbols are specified, indicate them alphabetically. Combination of [B] and [K] is not possible.  
Note 5) Dual 3-port valve is not applicable.

# T VQ1000/2000 Series Kit (Terminal block box)

**IP65 compliant**

- This kit has a small terminal block inside a junction box. The electrical entry port (VQ1000: G 1/2, VQ2000: G 3/4) permits connection of conduit fittings.
- Maximum stations: 24 (VQ1000), 20 (VQ2000)
- Enclosure: Dust-tight, Water-jet-proof (IP65) compatible (VQ2000 series)

## Manifold Specifications

Series	Piping specifications			Applicable stations
	Piping direction	Port size	Port size	
VQ1000	Side	C8	C3, C4, C6, M5	Max. 24 stations
VQ2000	Side	C10	C4, C6, C8	Max. 20 stations

## Terminal Block Connection (VQ1000)

Open the terminal block cover to connect the wires to the terminal block.

### Step 1. Removing the terminal block cover

Loosen the screws on the terminal block cover and open it in the direction shown by the arrow. The cover can then be removed from the terminal block.

### Step 2. Wiring

The diagram on the left shows the terminal block wiring schematic. All stations are provided with double solenoid wiring. Insert each lead wire into the terminal opening and tighten the screw directly above.

How to connect is inserting the lead wire into the terminal window, then tighten the screw on the top. (Tightening torque: 0.25 to 0.35 N·m)

### Step 3. Mounting the terminal block cover

Hook groove (a) on shaft (b) and close the cover. Then tighten the screws.

The total number of stations is tabulated starting from station one on the D-side.

- Note 2) Models with a suffix "B" have check valves for prevention of back pressure at all manifold stations. When a back pressure check valve is desired, and is to be installed only in certain manifold stations, specify the mounting position by means of the manifold specification sheet.
- Note 3) The number of stations that may be displayed is longer than the manifold number of stations. Note 4) Specify the mounting position by means of the manifold specification sheet.
- Note 5) Refer to page 418 for details on with ejector unit. A combination of "J" and "N" is not available.
- Note 6) Specify the wiring specifications by means of the manifold specification sheet.
- Note 7) Indicate "R" for the valve with external pilot.
- Note 8) G1, G2, or G3 cannot be combined with N.
- Note 9) When used in combination with the direct EXH outlet with built-in silencer type, keep the exhaust port from coming into direct contact with water or other liquids.

• Terminal Block Wiring (VQ2000)

Open the terminal block cover to connect the wires to the terminal block.

**Step 1. Removing the terminal block cover**

Loosen mounting screws (4 pcs.) on the terminal block cover and remove the cover.

**Step 2. Wiring**

Loosen screws on the terminal block, connect wiring and complete it by tightening screws. (Tightening torque: 0.5 to 0.7 N·m)

The diagram on the right shows the terminal block wiring. All stations are provided with double wiring regardless of the valves which are mounted.

**Step 3. Mounting the terminal block cover**

Securely tighten the screws after confirming that the gasket is installed correctly. (Tightening torque: 0.7 to 1.2 N·m)

Applicable crimped terminal:  
1.25-3S, 1.25Y-3,  
1.25Y-3N, 1.25Y-3.5

# VQ1000/2000 Series Kit (Lead wire)

## IP65 compliant

- Direct electrical entry. Models with one or more stations are available.
- (SUP) and (EXH) ports are provided on one side for further space savings.
- Maximum stations are 8.
- Enclosure: Dust-tight, Water-jet-proof (IP65) compatible (VQ2000 series)

## Wiring Specifications: Positive COM ●

Three lead wires are attached to each station regardless of the type of valve which is mounted.  
The red wire is for COM connection.

Single solenoid

Double solenoid

Use any of the below cable lead wire assembly to change the lead wire length:

### Lead wire assembly with connector

Lead wire length	Part no.
0.6 m	VVQ1000-84A-6-*
1.5 m	VVQ1000-84A-15-*
3 m	VVQ1000-84A-30-*

\* Station number 1 to 8

## Manifold Specifications

Series	Piping specifications		Applicable stations	
	Piping direction	Port size		
VQ1000	Side	1(P), 3(R)	4(A), 2(B)	Max. 8 stations
		C8	C3, C4, C6, M5	
VQ2000	Side	C10	C6, C8	Max. 8 stations

VV5Q11

VV5Q21

The total number of stations is tabulated on the D-side.

## How to Order Manifold

Note) For CE/UKCA-compliant models, DC-type only.

## Option

Symbol	Option	VQ1000	VQ2000
Nil	None	●	●
2	200/220 VAC models (F/L kit only)	●	●
B	With back pressure check valve	●	●
D	DIN rail mounting	●	●
D	With DIN rail bracket (Without DIN rail)	●	●
D	DIN rail length specified (□: Stations 02 to 24)	●	●
G1	1 set of regulator unit	●	—
G2	2 sets of regulator unit	●	—
G3	3 sets of regulator unit	●	—
J	With ejector unit	●	—
N	With name plate	●	●
R	External pilot	●	●
S	Direct EXH outlet with built-in silencer	●	●
W	Enclosure: Dust-tight, Water-jet-proof (IP65)	●	●

- Note 1) When two or more symbols are specified, indicate them alphabetically. Example) -BRS
- Note 2) Models with a suffix "B" have check valves for prevention of back pressure at all manifold stations. When a back pressure check valve is desired, and is to be installed only in certain manifold stations, specify the mounting position by means of the manifold specification sheet.
- Note 3) The number of stations that may be displayed is longer than the manifold number of stations.
- Note 4) Specify the mounting position by means of the manifold specification sheet.
- Note 5) Refer to page 418 for details on all ejector unit. A combination of "J" and "N" is not available.
- Note 6) Indicate "R" for the valve with external pilot.
- Note 7) G1, G2, or G3 cannot be combined with N.
- Note 8) A combination of "2" and "W" is unavailable. When the compatibility with IP65 of the 200 and 220 VAC specifications is required, select only "W".
- Note 9) When used in combination with the direct EXH outlet with built-in silencer, keep the exhaust port from coming into direct contact with water or other liquids.

Note) For negative common specifications, refer to "Semi-standard" on page 405.

- Note 1) Insert "L" (Top ported) or "B" (Bottom ported) for elbow type.  
Example) B6 (Bottom ported elbow with ø6 One-touch fitting)
- Note 2) Indicate "LM" (Including upward, downward piping and mixed) for models with elbow fittings and mixed cylinder port sizes.
- Note 3) Indicate "Mixed sizes and with port plug" by means of the manifold specification sheet.
- Note 4) When selecting the mixed size for different types of piping, dual flow fitting assembly, or double check block (direct mounting), enter "MM" and give instructions in the manifold specification sheet.
- Note 5) Inch-size One-touch fittings are available. Refer to "Semi-standard" on page 406 for details.

**VV5Q21**  
Dust-tight, Water-jet-proof

• **Wiring Specifications: Negative COM (Semi-standard)**

Three lead wires are attached to each station regardless of the type of valve which is mounted.  
The black wire is for COM connection.

**Single solenoid**

**Double solenoid**

**Lead wire assembly with connector**

Lead wire length	Part no.
0.6 m	VVQ1000-84AN-6-*
1.5 m	VVQ1000-84AN-15-*
3 m	VVQ1000-84AN-30-*

\* Station number 1 to 8

Note) When using the negative common specifications, use valves for negative common.  
For negative common specifications, refer to "Semi-standard" on page 405.

**How to Order Valves**

Note) For CE/UKCA-compliant models, DC-type only.

2	2-position double
3	3-position closed center
4	3-position exhaust center
5	3-position pressure center
A	4-position dual port (N.C. +N.C.)
B	4-position dual port (N.O. +N.O.)
C	4-position dual port (N.C. +N.O.)

**CE/UKCA-compliant**

Nil	—
Q	CE/UKCA-compliant

Note) For CE/UKCA-compliant models, DC-type only.

**Enclosure**

Nil	Dust-protected
W (Note)	Dust-tight, Water-jet-proof (IP65)

Note) VQ2000 only

**Manual override**

Nil	Non-locking push type (Tool required)
B	Locking type (Tool required)
C	Locking type (Manual)
D	Slide locking type (Manual)

**Light/Surge voltage suppressor**

Nil	Yes
E (Note)	None (Non-polar)

Note) A combination of "Function [N] (Negative common)" and [E] is unavailable.  
Since [E] has no polarity, it can also be used as a negative common. Selection of "Function [N]" is not required.

**Coil voltage**

	CE/UKCA-compliant
1	100 VAC (50/60 Hz) —
2	200 VAC (50/60 Hz) —
3	110 VAC (50/60 Hz) —
4	220 VAC (50/60 Hz) —
5	24 VDC ●
6	12 VDC ●

Note 1) Refer to page 375 for power consumption of AC type.  
Note 2) Metal seal only  
Note 3) For external pilot and negative common specifications, refer to "Semi-standard" on pages 405 and 406.  
Note 4) When two or more symbols are specified, indicate them alphabetically. Combination of [B] and [K] is not possible.  
Note 5) Dual 3-port valve is not applicable.

**How to Order Manifold Assembly**

Specify the part numbers for valves and options together beneath the manifold base part number.

**<Example>**

Lead wire kit with cable (3 m)  
**VV5Q11-06C6L2** ····1 set—Manifold base part no.  
 \*VQ1100-51 ······2 sets—Valve part no. (Stations 1 to 2)  
 \*VQ1200-51 ······2 sets—Valve part no. (Stations 3 to 4)  
 \*VQ1300-51 ······1 set—Valve part no. (Station 5)  
 \*VVQ1000-10A-1 ····1 set—Blanking plate part no. (Station 6)

Write sequentially from the 1st station on the D-side.  
When part nos. written collectively are complicated, specify them by means of the manifold specification sheet.

Prefix the asterisk to the part nos. of the solenoid valve, etc.

**⚠ Caution**

Use the standard (DC) specification when continuously energizing for long periods of time.

Note 2) When selecting the mixed size for different types of piping, dual flow fitting assembly, or double check block (direct mounting), enter "MM" and give instructions in the manifold specification sheet.

Refer to the **Web Catalog** and the **Operation Manual** for the details of EX510 Gateway-type Serial Transmission System.

Please download the **Operation Manual** via our website, <https://www.smcworld.com>

## How to Order Manifold Assembly

### Example

VV5Q11-SB08C6-D ... 1 set (SB kit, 8-station manifold part no.)  
 VQ1100-51 ..... 4 sets (Single type part no.)  
 VQ1200-51 ..... 3 sets (Double type part no.)  
 VQ1300-51 ..... 1 set (3 position type part no.)

The asterisk denotes the symbol for assembly. Prefix it to the part nos. of the solenoid valve, etc.

Enter in order starting from the first station on the D-side.

Add the valve and option part numbers under the manifold base part number. In the case of complex arrangement, specify them by means of the manifold specification sheet.

**How to Order Manifold Assembly**

Specify the part numbers for valves and options together beneath the manifold base part number.

**<Example>**  
 VV5Q11-08C6SV...1 set—Manifold base part no.  
 \*VQ1100-51...2 sets—Valve part no. (Stations 1 to 2)  
 \*VQ1200-51...4 sets—Valve part no. (Stations 3 to 6)  
 \*VQ1300-51...1 set—Valve part no. (Station 7)  
 \*VVQ1000-10A-1...1 set—Blanking plate part no. (Station 8)

Write sequentially from the 1st station on the D-side.  
 When part nos. written collectively are complicated, specify them by means of the manifold specification sheet.

Prefix the asterisk to the part nos. of the solenoid valve, etc.

**Function**

Symbol	Specifications	DC
Nil	Standard	(0.4 W) ○
B	High-speed response type	(0.95 W) ○
K (Note 1)	High-pressure type (1.0 MPa)	(0.95 W) ○
N (Note 2)	Negative common	○
R (Note 2) (Note 4)	External pilot	○

Note 1) Metal seal only  
 Note 2) For external pilot and negative common specifications, refer to "Semi-standard" on pages 405 and 406.  
 Note 3) When two or more symbols are specified, indicate them alphabetically. Combination of [B] and [K] is not possible.  
 Note 4) Dual 3-port valve is not applicable.

# VQ1000/2000 Series

## Kit (Serial transmission): For EX120 Integrated-type (For Output) Serial Transmission System

### VV5Q11

The dashed lines indicate DIN rail mounting [-D] (with DIN rail mounting bracket).

With ejector unit: Formula  
 $L1 = 10.5n + 28.7 + (\text{Number of ejector units} \times 26.7)$   
 $L2 = 10.5n + 56.3 + (\text{Number of ejector units} \times 26.7)$   
 L4 is L2 plus about 30.

### Dimensions

Formula  $L1 = 10.5n + 44.5$ ,  $L2 = 10.5n + 72.5$  n: Station (Maximum 16 stations)

L	n	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
L1		65.5	76	86.5	97	107.5	118	128.5	139	149.5	160	170.5	181	191.5	202	212.5

# M VQ2000 Series Kit (Circular connector)

VQ2000 only

- MIL flat cable connector reduces installation labor for electrical connection.
- Manifold and connectors, both compliant with the IP65 rating (Dust-tight, Water-jet-proof), provide a high-degree of protection for the electrical parts. (When selecting option W)
- Maximum stations are 24.

## Manifold Specifications

Series	Piping specifications			Applicable stations
	Piping direction	Port size		
VQ2000	Side	1(P), 3(R)	4(A), 2(B)	Max. 24 stations

## Circular Connector (26 Pins)

## Cable Assembly ●

AXT100-MC26-015  
030  
050

(Circular connector cable assembly included in a specific manifold model no.)  
Refer to "How to Order Manifold."

### Circular connector cable assembly

Cable length (L)	Assembly part no.	Note
1.5 m	AXT100-MC26-015	Cable 25-core x 24AWG
3 m	AXT100-MC26-030	
5 m	AXT100-MC26-050	

\* Cannot be used for transfer wiring.

### Electrical characteristics

Item	Property
Conductor resistance Ω/km, 20°C	65 or less
Voltage limit V, 1 min, AC	1000
Insulation resistance MΩ/km, 20°C or more	5

Note) The minimum bending radius of the circular connector cable is 20 mm.

### Circular connector cable assembly terminal no.

Terminal no.	Lead wire color	Dot marking
1	Black	None
2	Brown	None
3	Red	None
4	Orange	None
5	Yellow	None
6	Pink	None
7	Blue	None
8	Purple	White
9	Gray	Black
10	White	Black
11	White	Red
12	Yellow	Red
13	Orange	Red
14	Yellow	Black
15	Pink	Black
16	Blue	White

21	Brown	White
22	Pink	Red
23	Gray	Red
24	Black	White
25	White	None
26	White	None

Note) Lengths other than the above are also available. Please contact SMC for details.

Note) For CE/UKCA-compliant models, DC-type only. [Option]

## How to Order Manifold

Note 1) Insert "L" (Top ported) or "B" (Bottom ported) for elbow type. Example) B6 (Bottom ported elbow with ø6 One-touch fitting)

Note 2) Indicate "LM" (Including upward, downward piping and mixed) for models with elbow fittings and mixed cylinder port sizes.

Note 3) Indicate "Mixed sizes and with port plug" by means of the manifold specification sheet.

Note 4) When selecting the mixed size for different types of piping, dual flow fitting assembly, or double check block (direct mounting), enter "MM" and give instructions in the manifold specification sheet.

Note 5) Inch-size One-touch fittings are available. Refer to "Semi-standard" on page 406 for details.

Note 1) When two or more symbols are specified, indicate them alphabetically. Example) BKR

Note 2) Models with a suffix "-B" have check valves for prevention of back pressure at all manifold stations. When a back pressure check valve is desired, and is to be installed only in certain manifold stations, specify the mounting position by means of the manifold specification sheet.

Note 3) The number of stations that may be displayed is longer than the manifold number of stations.

Note 4) Specify the wiring specifications by means of the manifold specification sheet.

Note 5) Indicate "R" for the valve with external pilot.

Note 6) When used in combination with the direct EXH outlet with built-in silencer type, keep the exhaust port from coming into direct contact with water or other liquids.

VV5Q21

The total number of stations is tabulated starting from station one on the D-side.

Electrical Wiring Specifications

As the standard electrical wiring specifications, double wiring (connected to SOL A and SOL B) is adopted for the internal wiring of each station for 12 stations or less, regardless of valve and option types. Mixed single and double wiring is available as semi-standard. Refer to page 405 for details.

Note) When using the negative common specifications, use valves for negative common. (Refer to page 405.)  
Refer to "Semi-standard" on page 405 for details.

How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

<Example>  
Circular connector kit with cable (3 m)  
VV5Q21-09C6M2-W · 1 set—Manifold base part no.  
+ VQ2100-51 ······ 3 sets—Valve part no. (Stations 1 to 3)  
+ VQ2200-51 ······ 3 sets—Valve part no. (Stations 4 to 6)  
+ VQ2300-51 ······ 2 sets—Valve part no. (Stations 7 to 8)  
+ VVQ2000-10A-1 ···· 1 set—Blanking plate part no. (Station 9)

Prefix the asterisk to the part nos. of the solenoid valve, etc.  
Write sequentially from the 1st station on the D-side. When part nos. written collectively are complicated, specify them by means of the manifold specification sheet.

**Caution**  
Use the standard (DC) specification when continuously energizing for long periods of time.

## Semi-standard

### Different Number of Connector Pins

F and P kits with the following number of pins are available besides the standard number (F = 25P; P = 26P). Select the desired number of pins and cable length from the cable assembly list. Place an order for the cable assembly separately.

#### **F** kit (D-sub connector) 15 pins

#### How to Order Manifold

#### How to Order

D-sub connector, 15 pins  
Connector location—Side  
Without cable

#### Kit type/Electrical entry

Pins	Location	Top entry	Side entry
15P (Max. 7 stations)		<b>F</b> kit	<b>SA</b>

\* In the same way as the 25-pin models (standard), the terminal no. 1 is for SOL.A at the 1st station, the terminal no. 9 for SOL.B at the 1st station, and the terminal no. 8 for COM.

#### Wire Color Table by Terminal No. of D-sub Connector Cable Assembly

Terminal no.	Lead wire color	Dot marking
1	Black	None
2	Brown	None
3	Red	None
4	Orange	None
5	Yellow	None
6	Pink	None
7	Blue	None
8	Purple	White
9	Gray	Black
10	White	Black
11	White	Red
12	Yellow	Red
13	Orange	Red
14	Yellow	Black
15	Pink	Black

#### D-sub Connector Cable Assembly

Cable length (L)	Pins	15P
1.5 m		AXT100-DS15-1
3 m		AXT100-DS15-2
5 m		AXT100-DS15-3

\* For other commercial connectors, use a type conforming to MIL-C-24308.

#### **P** kit (Flat ribbon cable) 10/16/20 pins

#### How to Order Manifold

#### How to Order

Flat ribbon cable, 20 pins  
Connector location—Side  
Without cable

#### Kit type/Electrical entry

Pins	Location	Top entry	Side entry
10P (Max. 4 stations)	<b>P</b> kit	<b>UA</b>	<b>SA</b>
16P (Max. 7 stations)		<b>UB</b>	<b>SB</b>
20P (Max. 9 stations)		<b>UC</b>	<b>SC</b>

\* In the same way as the 26-pin models (standard), the terminal no. 1 is for SOL.A at the 1st station, the terminal no. 2 for SOL.B at the 1st station, and two pins from the max. terminal numbers are for COM.

#### Flat Ribbon Cable Assembly

Cable length (L)	Pins	10P	16P	20P
1.5 m		AXT100-FC10-1	AXT100-FC16-1	AXT100-FC20-1
3 m		AXT100-FC10-2	AXT100-FC16-2	AXT100-FC20-2
5 m		AXT100-FC10-3	AXT100-FC16-3	AXT100-FC20-3
Connector width (W)		17.2	24.8	30

\* For other commercial connectors, use a type with strain relief conforming to MIL-C-83503.

### Special Wiring Specifications

In the internal wiring of F/P/J/G/T/S kit, double wiring (connected to SOL. A and SOL. B) is adopted for each station regardless of the valve and option types. Mixed single and double wiring is available as an option.

#### 1. How to Order

Indicate an option symbol "K", for the manifold no. and be sure to specify the mounting position and number of stations of the single and double wiring by means of the manifold specification sheet.

Example) **VV5Q11-08C6FU1-DKS**

#### 2. Wiring specifications

With the A side solenoid of the 1st station as no.1 (meaning, to be connected to no.1 terminal), without making any terminals vacant.

#### 3. Max. number of stations

The maximum number of stations depends upon the number of solenoids. Assuming one for a single and two for a double, determine the number of stations so that the total number is not more than the max. number given in the following table.

Kit	F kit (D-sub connector)		P kit (Flat ribbon cable)				J kit (Flat ribbon cable)	G kit (Flat ribbon cable with terminal block)
Type	F <sub>S</sub> <sup>U</sup> □ 25P	F <sub>S</sub> <sup>U</sup> A <sub>15</sub> P	P <sub>S</sub> <sup>U</sup> □ 26P	P <sub>S</sub> <sup>U</sup> C <sub>20</sub> P	P <sub>S</sub> <sup>U</sup> B <sub>16</sub> P	P <sub>S</sub> <sup>U</sup> A <sub>10</sub> P	J <sub>S</sub> <sup>U</sup> □ 20P	G □
Max. points	24	14	24	18	14	8	16	16

Kit	T kit (Terminal block box)		S kit (Serial transmission)	M kit (Circular connector)
Type	VQ1000		S □	M □
	2 rows of terminal blocks	3 rows of terminal blocks		
	16	24		
Max. points	VQ2000		16	24

### Negative Common Specifications

Specify the valve model no. as shown below for negative common specification.

The manifold no. shown below is for the T (VQ1000) and L (VQ1000/2000) kits. For other kits the standard manifold can be used. However, negative common is not compatible with S (except EX510 Gateway-type, EX240 integrated-type and EX120/121/122 integrated-type (CompoNet®)) and G kits.

#### How to Order Valves

**VQ1100 N-51**

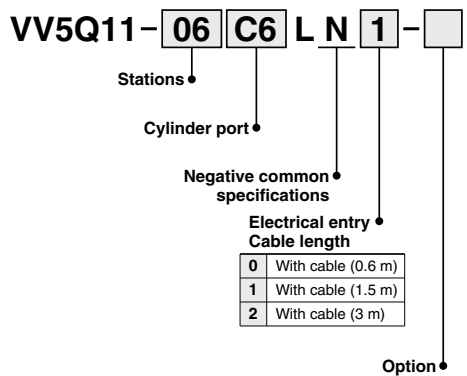

#### How to Order Manifold

T kit (VQ1000):

L kit (VQ1000/2000):

Option	Cable length
0	With cable (0.6 m)
1	With cable (1.5 m)
2	With cable (3 m)

# VQ1000/2000 Series

## Semi-standard

### External Pilot Specifications

When the supply air pressure is lower than the required minimum operating pressure (0.1 to 0.2 MPa) for the solenoid valve (or when the valve is used for vacuum), specify an external pilot model. Order a manifold or valve by suffixing the external pilot specification, "R". The X-port of the manifold base is equipped with One-touch fittings for external pilot.  
 VQ1000: C4 (ø4 One-touch fitting)  
 VQ2000: C6 (ø6 One-touch fitting)

#### How to Order Manifold

**VV5Q11-08C6FU1-R S**

#### How to Order Valves

**VQ1100 R - 51**

Note 1) When two or more functions are specified, indicate them alphabetically.  
 Note 2) Since the pilot EXH of this valve is released from the R1 passage, it is not possible to vacuum from a part other than EXH pressure and SUP ports.

### Inch-size One-touch Fittings

The valve with inch-size One-touch fittings is shown below.

#### Cylinder port

Symbol	N1	N3	N7	N9	M5T	NM
Applicable tubing O.D. (Inch)	ø1/8"	ø5/32"	ø1/4"	ø5/16"	10-32UNF (MS thread)	Mixed
4(A), 2(B) port	<b>VQ1000</b>	●	●	—	●	●
	<b>VQ2000</b>	—	●	●	—	●

Note) When inch-size fittings are selected for the cylinder port, inch-size fittings are selected on 1(P), 3(R) port, too.

1(P), 3(R) port size  
 VQ1000 ..... ø5/16" (N9)  
 VQ2000 ..... ø3/8" (N11)

### DIN Rail Mounting

Each manifold can be mounted on a DIN rail. Order it by indicating a DIN rail mounting option symbol, "-D". In this case, a DIN rail which is approx. 30 mm longer than the manifold with the specified number of stations is attached.

- When DIN rail is unnecessary (DIN rail mounting brackets only are attached.)  
 Indicate the option symbol, -D0, for the manifold part number.

#### Example)

**VV5Q11-08C6FU1-D0S**

Others, option symbols: to be indicated alphabetically.

- When using DIN rail longer than the manifold with specified number of stations  
 Clearly indicate the necessary number of stations next to the option symbol "D" for the manifold part number.

#### Example)

**VV5Q11-08C6FU1-D09S**

DIN rail for 9 stations

Others, option symbols: to be indicated alphabetically.

\*The number of stations that may be displayed is longer than the manifold number of stations.

- When changing to a DIN rail mounting.  
 Order brackets for mounting a DIN rail. (Refer to "Manifold Optional Parts" on pages 416 and 422.)

No. VVQ1000-57A (For VQ1000)  
 VVQ2000-57A (For VQ2000)  
 2 pcs. per one set.

- When ordering DIN rail only  
 DIN rail no.: **AXT100-DR-□**

\* As for □, specify the number from the DIN rail table. Refer to the dimensions of each kit for L dimension.

#### L Dimension

$$L = 12.5 \times n + 10.5$$

Note) A set of parts containing 12 pcs. each is enclosed.

## <U-Side End Plate Assembly>

### ⑥ U-side end plate assembly no. (For F/P/S kits)

**VVQ1000-2A-1-**

#### Option

<b>Nil</b>	Common EXH
<b>R</b>	External pilot
<b>S</b>	Direct EXH outlet with built-in silencer

Note) The ③'s fitting assembly is included.

### ⑦ U-side end plate assembly no. (For L kit)

**VVQ1000-2A-1-L**

## <Fitting Assembly>

### ⑬ Fitting assembly part no. (For cylinder port)

**VVQ1000-50A-**

#### Port size

<b>C3</b>	Applicable tubing ø3.2
<b>C4</b>	Applicable tubing ø4
<b>C6</b>	Applicable tubing ø6
<b>M5</b>	M5 thread

Note) Purchasing order is available in units of 10 pieces.

### ⑭ Fitting assembly part no. (For 1(P), 3(R) port)

**VVQ1000-51A-C8**

#### Applicable tubing ø8

Note) Purchasing order is available in units of 10 pieces.

### ⑮ Tie-rod assembly part no. (2 pcs./set)

**VVQ1000-TR-**

Note 1) Please order when eliminating manifold stations.

When adding stations, tie-rods are attached to the manifold block assembly. Therefore, it is not necessary to order.

Note 2) : Stations 02 to 24

Note 3) For S/P/F/L kits

## Pilot valve assembly

**V112 -A**

#### Function

Symbol	Specifications	DC	AC	
<b>Nil</b>	Standard	(0.4 W)	<input type="radio"/> <small>Note 1</small>	<b>1</b> 100 VAC (50/60 Hz)
		<input type="radio"/>	<input type="radio"/>	<b>2</b> 200 VAC (50/60 Hz)
<b>B</b>	High-speed response type	(0.95 W)	<input type="radio"/>	<b>3</b> 110 VAC (50/60 Hz)
		<input type="radio"/>	<input type="radio"/>	<b>4</b> 220 VAC (50/60 Hz)
<b>K</b>	High-pressure type (1.0 MPa)	(0.95 W)	<input type="radio"/>	<b>5</b> 24 VDC
		<input type="radio"/>	<input type="radio"/>	<b>6</b> 12 VDC

Note 1) Refer to page 375 for power consumption of AC type.

Note 2) Common to single solenoid and double solenoid

Note 3) The voltage (including light/surge voltage suppressor), positive common and negative common cannot be changed by changing the pilot valve assembly.

C6	Applicable tubing ø6
C8	Applicable tubing ø8

Note) Purchasing order is available in units of 10 pieces.

### ⑭ Fitting assembly part no. (For 1(P), 3(R) port)

VVQ2000-51A-C10

#### Applicable tubing ø10

Note) Purchasing order is available in units of 10 pieces.

### ⑮ Tie-rod assembly part no. (2 pcs./set)

VVQ2000-TR-□

Note 1) Please order when eliminating manifold stations.

When adding stations, tie-rods are attached to the manifold block assembly. Therefore, it is not necessary to order.

Note 2) □: Stations 02 to 24

Note 3) For S/P/F/L kits

# VQ1000 Series

## VQ1000: Manifold Optional Parts

### Blanking plate assembly VVQ1000-10A-1

It is used by attaching on the manifold block for being prepared for removing a valve for maintenance reasons or planning to mount a spare valve, etc.

### Individual SUP spacer VVQ1000-P-1-C6

When the same manifold is to be used for different pressures, individual SUP spacers are used as SUP ports for different pressures. (One station space is occupied.) Block both sides of the station, for which the supply pressure from the individual SUP spacer is used, with SUP block plates. (Refer to the application example.)

\* Specify the spacer mounting position and SUP block plate position by means of the manifold specification sheet. The block plate is used in one or two places for one set. (Two SUP block plates for blocking SUP station are attached to the individual SUP spacer.)

\* As a standard, electric wiring is connected to the position of the manifold station where the individual SUP spacer is mounted.  
\* If wiring is not required for stations equipped with spacers, enter "X" in the special wiring specifications column in the manifold specification sheet.

### Individual EXH spacer VVQ1000-R-1-C6

When valve exhaust affects other stations due to the circuit configuration, this spacer is used for individual valve exhaust. (One station space is occupied.) Block both sides of the individual valve EXH station. (Refer to the application example.)

\* Specify the mounting position, as well as the EXH block base or EXH block plate position by means of the manifold specification sheet. The block plate is used in one or two places for one set.  
\* An EXH block base assembly is used in the blocking position when ordering an EXH spacer incorporated with a manifold no. However, do not order an EXH block base assembly because it is attached to the spacer.

When separately ordering an individual EXH spacer, separately order an EXH block base assembly because it is not attached to the spacer.

\* As a standard, electric wiring is connected to the position of the manifold station where the individual EXH spacer is mounted.  
\* If wiring is not required for stations equipped with spacers, enter "X" in the special wiring specifications column in the manifold specification sheet.  
\* Do not install any back pressure check valve on other manifold station, on which the spacer is to be mounted. When installing the back pressure check valve on other manifold station, be sure to specify the manifold station position on the manifold specification sheet instead of ordering by specifying the manifold option symbol "B".

Description/Model		Stations						
Valve	Single	1	2	3	4	5	6	7
Option	Individual EXH spacer VVQ1000-R-1-C6							
	EXH blocking position: Specify 2 places.							

### SUP block plate VVQ1000-16A

When different pressures are supplied to a manifold, a SUP block plate is used to block the stations under different pressures.

\* Specify the mounting position by means of the manifold specification sheet.

#### <Block indication label>

Indication labels to confirm the blocking position are attached (Each for SUP passage and SUP/EXH passage blocking positions).

\* When ordering a block plate incorporated with a manifold, a block indication label is attached to the manifold.

SUP passage blocked

SUP/EXH passage blocked

### Blanking plate with connector VVQ1000-1C

Connector		Connector lead wire length (mm)	
Nil	Without connector	20	2000
1	With connector/2-wire	10	1000
2	With connector/4-wire	15	1500

Blanking plate with a connector for individually outputting electricity to drive a single valve or equipment that are not on the manifold base.

\* When "N" is suffixed to the end of the name plate, the plate will be different from a standard shape.

Note) Electric current should be 1A or less (including the mounted valves).

### Connector assembly part no.

AXT661-43A-6

Lead wire length (mm)	Part No.
Nil	300
6	600
10	1000
20	2000
30	3000

**EXH block base assembly**

**VVQ1000-19A-F** (C3/C4/C6/M5/N1/N3/N7)

Manifold block assembly ↓

**Electrical entry**

<b>F0</b>	Without lead wire
<b>F1</b>	For F kit (2 to 12 stations)/Double wiring
<b>F2</b>	For F kit (13 to 24 stations)/Double wiring
<b>F3</b>	For F kit (2 to 24 stations)/Single wiring
<b>P1</b>	For P, G, T, S kit (2 to 12 stations)/Double wiring
<b>P2</b>	For P, G, T, S kit (13 to 24 stations)/Double wiring
<b>P3</b>	For P, G, T, S kit (2 to 24 stations)/Single wiring
<b>L0*</b>	L0 kit
<b>L1*</b>	L1 kit * 1 to 8 stations
<b>L2*</b>	L2 kit

The manifold block assembly is used between stations for which exhaust is desired to be divided when valve exhaust affects other stations due to the circuit configuration. The EXH passage on the D-side is blocked in the EXH block base assembly. It is also used in combination with an individual EXH spacer for individual exhaust.

**<Block indication label>**

Indication labels to confirm the blocking position are attached. (Each for EXH passage and SUP/EXH passage blocking positions)

When ordering a EXH block base incorporated with a manifold, a block indication label is attached to the manifold.

Specify the mounting station by means of the manifold specification sheet.

When ordering this option incorporated with a manifold, specify the EXH block base assembly part number with "\*" in front of it beneath the manifold part number.

EXH passage blocked

SUP/EXH passage blocked

**Back pressure check valve assembly [-B]**

**VVQ1000-18A**

It prevents cylinder malfunction caused by other valve exhaust entry. Insert it into R (EXH) port on the manifold side of a valve which is affected. It is effective when a single-acting cylinder is used or an exhaust center type solenoid valve is used.

When ordering it being mounted on all manifold stations, suffix "-B" to the end of the manifold part number.

Note) When a back pressure check valve is desired, and it is to be installed only in certain manifold stations, clearly indicate the part number and specify the mounting station by means of the manifold specification sheet.

**(Precautions)**

- The manifold installed type back pressure check valve assembly is assembly parts with a check valve structure. However, since slight air leakage against the back pressure is allowed due to its structure, adverse effects of the back pressure due to increase in exhaust resistance cannot be prevented if the manifold exhaust port and other exhaust ports are put together for piping or if the piping diameter is narrowed. As a result, this may cause the actuator and air operated equipment to malfunction. So, be careful not to restrict the exhaust air.
- When a back pressure check valve is mounted, the effective area of the valve will decrease by about 20%.

**Name plate [-N]**

**VVQ1000-NC** -N-Station (1 to Max. stations) (-X4)

N: Standard  
NC: For mounting blanking plate with connector

-X4: For mounting slide locking type manual valve

It is a transparent resin plate for placing a label that indicates solenoid valve function, etc.

Insert it into the groove on the side of the end plate and bend it as shown in the figure.

- When the blanking plate with connector is mounted, it automatically will be "VVQ1000-NC-n"
- When the slide locking type manual valve is mounted, it automatically will be "VVQ1000-N-n-X4"
- When ordering this option incorporated with a manifold, suffix "-N" to the end of the manifold part number.

Note) { } : VVQ1000-NC-n  
Note) { } : VVQ1000-N-n-X4

**Blanking plug (For One-touch fittings)**

**KQ2P-□**

It is inserted into an unused cylinder port and SUP/EXH ports.  
Purchasing order is available in units of 10 pieces.

**Dimensions**

Applicable fitting size ød	Model	A	L	D	Applicable fitting size ød	Model	A	L	D
3.2	KQ2P-23	16	31.5	3.2	1/8"	KQ2P-01	16	31.5	5
4	KQ2P-04	16	32	6	5/32"	KQ2P-03	16	32	6
6	KQ2P-06	18	35	8	1/4"	KQ2P-07	18	35	8.5
8	KQ2P-08	20.5	39	10	5/16"	KQ2P-09	20.5	39	10

**Port plug**

**VVQ000-58A**

The plug is used to block the cylinder port.

- When ordering this option incorporated with a manifold, indicate "CM" for the port size of the manifold part number, as well as, the mounting station and cylinder port mounting positions 4(A) and 2(B) by means of the manifold specification sheet.
- Gently screw an M3 screw in the port plug hole and pull it for removal.

**Elbow fitting assembly**

**VVQ1000-F-L**(C3/C4/C6/M5/N1/N3/N7)

It is used for piping that extends upward or downward from the manifold.

When ordering this option incorporated with a manifold, indicate "□" or "B□" for the manifold port size (when installed in all stations.)

When installing it in part of the manifold stations, specify the elbow fitting assembly part number and the mounting station by means of the manifold specification sheet.

When mounting elbow fitting assembly on the edge of manifold station and a silencer on EXH port, select a silencer, AN203-KM8. A silencer (AN200-KM8) is interfered with fittings.

Downward

Upward

# VQ1000 Series

## VQ1000: Manifold Optional Parts

### DIN rail mounting bracket [-D/-D0/-D□] VVQ1000-57A

It is used for mounting a manifold on a DIN rail.

\* When ordering this option incorporated with a manifold, suffix "D" to the end of the manifold part number.

1 set of DIN rail mounting bracket is used for 1 manifold (2 DIN rail mounting brackets).

### Direct EXH outlet with built-in silencer [-S]

This is a type with an exhaust port at the top of the manifold end plate. The built-in silencer exhibits an excellent noise suppression effect. (Noise reduction: 30 dB)

\* When ordering this option incorporated with a manifold, suffix "S" to the end of the manifold part number.

Note) A large quantity of drainage generated in the air source results in exhaust of air together with drainage.

● Refer to page 429 for maintenance.

### Dual flow fitting assembly

#### VVQ1000-52A-C<sub>8</sub>-N<sub>9</sub>

This is a fitting to multiply the flow rate by combining the outputs of two valves. It is used for driving a large bore cylinder. This is a One-touch fitting for a port size of ø8 or ø5/16".

\* The port size for the manifold part number is "MM".

Clearly indicate the dual flow fitting assembly part number and specify the mounting station by means of the manifold specifications.

\* In dual flow fitting assembly, a special clip which is combined in one-piece of 2 stations is attached as a holding clip.

### Silencer (For EXH port)

This silencer is to be inserted into the EXH port (One-touch fittings) of the common exhaust type.

\* When mounting elbow fitting assembly (VVQ1000-F-L□) on the edge of manifold station, select a silencer, AN15-C08.

### Dimensions

Series	Applicable fitting size ød	Model	A	L	D	Effective area (mm <sup>2</sup> )	Noise reduction (dB)
VQ1000	8	AN15-C08	26.5	45	13	20	30

### Regulator unit

#### VVQ1000-AR-1

The regulator controls the SUP pressure in a manifold. Supply air from D-side SUP port is regulated. SUP port on U-side is plugged.

When a regulator unit is mounted, the SUP port on the U-side of the manifold will be plugged. A maximum of 3 units can be mounted on a manifold.

### Specifications

Maximum operating pressure (MPa)	0.8
Set pressure range (MPa)	0.05 to 0.7
Ambient and fluid temp. (°C)	5 to 50
Fluid	Air
Cracking pressure valve (MPa)	0.02
Structure	Relieving type

Pressure gauge

G27-10-01

Pressure control screw

### • How to Order

Indicate an option symbol "G" for the manifold no. and be sure to specify the mounting position and number of stations by means of the manifold specification sheet. One unit is counted as one station and occupies a space for three stations, therefore, pay attention to the manifold size. The regulator valve unit, to which no wire is connected, valves can be mounted up to the standard max. number of stations of each kit.

### How to Order Manifold

#### VV5Q11-14C6FUO-D-G 2

Number of manifold stations  
Number of mounted valves ... 12 sets

### Flow Rate Characteristics

### Pressure Characteristics

## ⚠ Caution

### • Pressure setting

Check the inlet pressure and then turn the pressure control screw to set the outlet pressure. Turning the screw clockwise will increase the outlet pressure while turning it counterclockwise decrease the pressure. (Set the pressure by turning the screw in the increase direction.)

### • Installation

Since some level of the actuator's operational frequency will increase a sharp pressure change, pay attention to the pressure gauge durability.

**Double check block (Separated) for VQ1000**  
**VQ1000-FPG-□□-□**

It is used on the outlet side piping to keep the cylinder in the intermediate position for a long time. Combining the double check block with a built-in pilot type double check valve and a 3-position exhaust center solenoid valve will enable the cylinder to stop in the middle or maintain its position for long periods of time.

The combination with a 2-position single/double solenoid valve will permit this block to be used for preventing the dropping at the cylinder stroke end when the SUP residual pressure is released.

**Specifications**

Max. operating pressure	0.8 MPa
Min. operating pressure	0.15 MPa
Ambient and fluid temp.	-5 to 50°C
Flow rate characteristics: C	0.60 dm <sup>3</sup> /(s·bar)
Max. operating frequency	180 c.p.m

(Note) Based on JIS B 8375-1981 (Supply pressure: 0.5 MPa)

...	...
16	16 stations

**Bracket Assembly**

Part no.	Tightening torque
VQ1000-FPG-FB	0.22 to 0.25 N·m

DIN rail mounting clip part number VQ1000-FPG-DC

This clip is used when mounting a double check block to a DIN rail. (It is the same as the one for the option "D" specification.)

When ordering a double check block, order the DIN rail mounting [-D].

**<Ordering example>**

VVQ1000-FPG-06 -6-station manifold

- \*VQ1000-FPG-3
- \*C4M5-D, 3 sets Double check block
- \*VQ1000-FPG-C6M5-D, 3 sets

**<Example>**

**Caution**

- Air leakage from the pipe between the valve and cylinder or from the fittings will prevent the cylinder from stopping for long periods of time. Check the leakage using neutral household detergent, such as dish washing soap. Also check the cylinder's tube gasket, piston packing and rod packing for air leakage.
- Since One-touch fittings allow slight air leakage, screw piping (with M5 thread) is recommended when stopping the cylinder in the middle for long periods of time.
- Combining double check block with 3-position closed center or pressure center solenoid valve will not work.
- M5 fitting assembly is attached, not incorporated into the double check block. After screwing in the M5 fittings, mount the assembly on the double check block. (Tightening torque: 0.8 to 1.2 N·m)
- If the exhaust of the double check block is restricted too much, the cylinder may not operate properly and may not stop immediately.
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.

# VQ1000 Series

## VQ1000: Manifold Option/With Ejector Unit

An ejector unit can be mounted on the manifold base for a solenoid valve. Instead of mounting the valve and ejector unit separately, this option reduces piping, wiring and creates additional space savings.

Note 1) SUP and EXH ports on the ejector unit manifold base are arranged on D-side alone. The end plate on the U-side is the same as that used in the L kit.

Note 2) Individual piping is provided for the supply and exhaust ports of the ejector unit.

Note 3) The manifold with an ejector unit is mounted from the U-side.

Note 4) One vacuum ejector unit corresponds to one station.

\* Specify the mounting station by means of the manifold specification sheet.

### Specifications

Ejector valve model	VVQ1000-J-□-□□1-A	VVQ1000-J-□-□□1-B
Nozzle diameter (mm)	0.7	1.0
Max. suction flow rate N (NL/min)	11	20
Max. vacuum pressure (mmHg)	-630	
Max. operating pressure (MPa)	0.7 (High-pressure type 0.8)	
Standard supply pressure (MPa)	0.5	
Operating temperature (°C)	5 to 50	

### Maximum Number of Ejector Units

(Max. number of ejector units is subject to the number of valve stations.)

Max. number of ejector units	Max. number of mounted valves		
	F, P, T kit	S, G, J kit	L kit
1	11 (20)	7 (14)	7
2	10 (16)	6 (12)	6
3	9 (12)	5 (10)	5
4	8 (8)	4 (8)	—
5	4 (4)	3 (4)	—

Note) The max. number of mounted valves applies to double wiring. Parenthesized numbers apply to single wiring. Please contact SMC for conditions other than the above or mixed wiring.

## Dimensions

## How to Order

VV5Q11-05C6FU0 - J P 1 S

Vacuum switch	
Nil	None
P	With

Number of ejectors  
1 to 5

Others, option symbols:  
to be indicated alphabetically.

### Example)

# VQ2000 Series

## VQ2000: Manifold Optional Parts

### Blanking plate assembly **Symbol** VVQ2000-10A-1

It is used by attaching on the manifold block for being prepared for removing a valve for maintenance reasons or planning to mount a spare valve, etc.

### Individual SUP spacer VVQ2000-P-1-C8 N9

When the same manifold is to be used for different pressures, individual SUP spacers are used as SUP ports for different pressures. (One station space is occupied.) Block both sides of the station, for which the supply pressure from the individual SUP spacer is used, with SUP block plates. (Refer to the application example.)

- \* Specify the spacer mounting position and SUP block plate position by means of the manifold specification sheet. The block plate is used in one or two places for one set. (Two SUP block plates for blocking SUP station are attached to the individual SUP spacer.)
- \* As a standard, electric wiring is connected to the position of the manifold station where the individual SUP spacer is mounted.
- \* If wiring is not required for stations equipped with spacers, enter "X" in the special wiring specifications column in the manifold specification sheet.

Block indication label  
A label indicating the SUP passage blocking position is to be adhered.

### Individual EXH spacer VVQ2000-R-1-C8 N9

When valve exhaust affects other stations due to the circuit configuration, this spacer is used for individual valve exhaust. (One station space is occupied.) Block both sides of the individual valve EXH station. (Refer to the application example.)

- \* Specify the mounting position, as well as the EXH block base or EXH block plate position by means of the manifold specification sheet. The block plate is used in one or two places for one set. (Two EXH block plates for blocking EXH station are attached to the individual EXH spacer.)
- \* As a standard, electric wiring is connected to the position of the manifold station where the individual EXH spacer is mounted.
- \* If wiring is not required for stations equipped with spacers, enter "X" in the special wiring specifications column in the manifold specification sheet.
- \* Do not install any back pressure check valve on the manifold station, on which the spacer is to be mounted. When installing the back pressure check valve on other manifold station, be sure to specify the manifold station position on the manifold specification sheet instead of ordering by specifying the manifold option symbol "B".

Block indication label  
A label indicating the EXH passage blocking position is to be adhered.

### SUP block plate VVQ2000-16A

When different pressures are supplied to a manifold, a SUP block plate is used to block the stations under different pressures.

- \* Specify the mounting position by means of the manifold specification sheet.

#### <Block indication label>

Indication labels to confirm the blocking position are attached. (Each for SUP passage and SUP/EXH passage blocking positions)

SUP passage blocked

SUP/EXH passage blocked

\* When ordering a block plate incorporated with a manifold, a block indication label is attached to the manifold.

### EXH block plate VVQ2000-19A

The EXH block plate is used between stations for which exhaust is desired to be divided when valve exhaust affects other stations configuration. It is also used in combination with an individual EXH spacer for individual exhaust.

- \* Specify the mounting position by means of the manifold specification sheet.

#### <Block indication label>

Indication labels to confirm the blocking position are attached. (Each for EXH passage and SUP/EXH passage blocking positions)

EXH passage blocked

SUP/EXH passage blocked

\* When ordering a block plate incorporated with a manifold, a block indication label is attached to the manifold.

**SUP stop valve spacer**  
**VVQ2000-24A-1**

A SUP stop valve spacer is mounted on a manifold block, making it possible to individually shut off supply air to each valve.  
 Enclosure: Dust-tight, Water-jet-proof (IP65) compliant

<Circuit diagram>  
 (Example of a spacer with a built-in single valve)

**Back pressure check valve assembly [-B]**  
**VVQ2000-18A**

It prevents cylinder malfunction caused by other valve exhaust entry. Insert it into R (EXH) port on the manifold side of a valve which is affected. It is effective when a single-acting cylinder is used or an exhaust center type solenoid valve is used.

• When ordering assemblies incorporated with a manifold, add suffix “-B” to the end of the manifold part number.  
 (Note) When a check valve for back pressure prevention is desired and is to be installed only in certain manifold stations, clearly indicate the part number and specify the mounting position by means of the manifold specification sheet.

(Precautions)

1. The manifold installed type back pressure check valve assembly is assembly parts with a check valve structure. However, since slight air leakage against the back pressure is allowed due to its structure, adverse effects of the back pressure due to increase in exhaust resistance cannot be prevented if the manifold exhaust port and other exhaust ports are put together for piping or if the piping diameter is narrowed. As a result, this may cause the actuator and air operated equipment to malfunction. So, be careful not to restrict the exhaust air.
2. When a back pressure check valve is mounted, the effective area of the valve will decrease by about 20%.

**Name plate [-N]**  
**VVQ2000-N-Station (1 to Max. stations) (-X4□)**

-X4A: For mounting slide locking type, manual, all single valves  
 -X4B: For mixed mounting of slide locking type, manual, single, double, and 3-position valves

It is a transparent resin plate for placing a label that indicates solenoid valve function, etc. Insert it into the groove on the side of the end plate and bend it as shown in the figure.  
 • When the slide locking type manual valve is mounted, it automatically will be “VVQ2000-N-n-X4A/X4B”  
 • When ordering this option incorporated with a manifold, suffix “-N” to the end of the manifold part number.

**Blanking plug (For One-touch fittings)**  
**KQ2P-□**

It is inserted into an unused cylinder port and SUP/EXH ports. Purchasing order is available in units of 10 pieces.

**Dimensions**

Applicable fitting size ød	Model	A	L	D	Applicable fitting size ød	Model	A	L	D
4	KQ2P-04	16	32	6	5/32"	KQ2P-03	16	32	6
6	KQ2P-06	18	35	8	1/4"	KQ2P-07	18	35	8.5
8	KQ2P-08	20.5	39	10	5/16"	KQ2P-09	20.5	39	10
10	KQ2P-10	22	43	12	3/8"	KQ2P-11	22	43	11.5

**Port plug**  
**VVQ1000-58A**

The plug is used to block the cylinder port.  
 • When ordering a plug incorporated with a manifold, indicate “CM” for the port size of the manifold part number, as well as, the mounting position and number of stations and cylinder port mounting positions, A and B by means of the manifold specification sheet.

# VQ2000 Series

## VQ2000: Manifold Optional Parts

### DIN rail mounting bracket [-D/-D0/-D□]

#### VVQ2000-57A

It is used for mounting a manifold on a DIN rail.

\* When ordering this option incorporated with a manifold, suffix "-D" to the end of the manifold part number.

1 set of DIN rail mounting bracket is used for 1 manifold (2 DIN rail mounting brackets).

### Direct EXH outlet with built-in silencer [-S]

This is a type with an exhaust port atop the manifold end plate. The built-in silencer exhibits an excellent noise suppression effect. (Noise reduction: 30 dB)

\* When ordering this option incorporated with a manifold, suffix "-S" to the end of the manifold part number.

Note 1) A large quantity of drainage generated in the air source results in exhaust of air together with drainage.

Note 2) When used in combination with "W" (IP65 specification), keep the exhaust port from coming into direct contact with water or other liquids. (T, L, S, and M kits)

● Refer to page 429 for maintenance.

### Silencer (For EXH port)

This silencer is to be inserted into the EXH port (One-touch fittings).

#### Dimensions

Series	Applicable fitting size $\phi d$	Model	A	L	D	Effective area (mm <sup>2</sup> ) (Cv factor)	Noise reduction (dB)
VQ2000	10	AN20-C10	36.5	57.5	16.5	30	30

### Elbow fitting assembly

#### VVQ2000-F-L(C4/C6/C8/N3/N7/N9)

It is used for piping that extends upward or downward from the manifold.

When not installed in the manifold stations, specify the assembly part number and the mounting position by means of the manifold specification sheet.

### Dual flow fitting assembly

#### VVQ2000-52A-C10

This is a fitting to multiply the flow rate by combining the outputs of 2-valve stations. It is used for driving a large bore cylinder. This is a One-touch fitting for a port size of  $\phi 10$  or  $\phi 3/8$ ".

\* The port size for the manifold part number is "MM".

Clearly indicate the dual flow fitting assembly part number and specify the mounting position by means of the manifold specifications.

## Manifold Option

### Double check block (Separated) for VQ2000

VQ2000-FPG-□□-□□

It is mounted on the outlet side piping to keep the cylinder in the intermediate position for a long time. Combining the double check block with a 3-position exhaust center solenoid valve will enable the cylinder to stop in the middle or maintain its position for long periods of time.

The combination with a 2-position single/double solenoid valve will prevent the dropping at the cylinder stroke end when the SUP residual pressure is released.

### Specifications

Max. operating pressure	0.8 MPa
Min. operating pressure	0.15 MPa
Ambient and fluid temp.	-5 to 50°C
Flow rate characteristics: C	3.0 dm <sup>3</sup> /(s·bar)
Max. operating frequency	180 c.p.m

Note) Based on JIS B 8375-1981  
(Supply pressure: 0.5 MPa)

Note) When two or more symbols are specified, indicate them alphabetically.  
Example) -DN

### Caution

- Air leakage from the pipe between the valve and cylinder or from the fittings will prevent the cylinder from stopping for long periods of time. Check the leakage using neutral household detergent, such as dish washing soap. Also check the cylinder's tube gasket, piston packing and rod packing for air leakage.
- Since One-touch fittings allow slight air leakage, screw piping is recommended when stopping the cylinder in the middle for long periods of time.
- Combining double check block with 3-position closed center or pressure center solenoid valve will not work.
- When fittings, etc. are being screwed to the double check block, tighten them with the torque below.

Connection threads	Proper tightening torque (N·m)
Rc 1/8	7 to 9
Rc 1/4	12 to 14

- If the exhaust of the double check block is restricted too much, the cylinder may not operate properly and may not stop immediately.
- Set the cylinder load so that the cylinder pressure will be within two thirds of the supply pressure.

### Manifold (DIN rail mounting)

VVQ2000-FPG-06

#### Stations

B4: With ø4 One-touch fitting (for bottom ported)

B6: With ø6 One-touch fitting (for bottom ported)

B8: With ø8 One-touch fitting (for bottom ported)

### ⚠ Caution

- Air leakage from the pipe between the valve and cylinder or from the fittings will prevent the cylinder from stopping for long periods of time. Check the leakage using neutral household detergent, such as dish washing soap.
- Also check the cylinder's tube gasket, piston packing and rod packing for air leakage.
- Since zero air leakage is not guaranteed, it is sometimes not possible to hold a stop position for long periods of time.
- Combining double check block with 3-position closed center or pressure center solenoid valve will not work.
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.
- If the exhaust of the double check block is restricted too much, the cylinder may not operate properly and may not stop intermediately.
- The perfect output port may vary depending on the piping direction. Perform the piping work after checking the port indication.

<b>2</b>	<p>2-position double (Metal)</p> <p>(A)4 2(B)</p> <p>(R1)5 1 3(R2) (P)</p>	<b>Note B</b>	<p>4-position dual 3-port valve</p> <p>(B) 4(A) 2(B)</p> <p>5(R1) 1(P) 3(R2) N.O. N.O.</p>
	<p>2-position double (Rubber)</p> <p>(A)4 2(B)</p> <p>(R1)5 1 3(R2) (P)</p>	<b>Note C</b>	<p>4-position dual 3-port valve</p> <p>(C) 4(A) 2(B)</p> <p>5(R1) 1(P) 3(R2) N.C. N.O.</p>
<b>3</b>	<p>3-position closed center</p> <p>(A)4 2(B)</p> <p>(R1)5 1 3(R2) (P)</p>	<b>Note</b> Rubber seal only	
<b>4</b>	<p>3-position exhaust center</p> <p>(A)4 2(B)</p> <p>(R1)5 1 3(R2) (P)</p>		
<b>5</b>	<p>3-position pressure center</p> <p>(A)4 2(B)</p> <p>(R1)5 1 3(R2) (P)</p>		

#### (B) Seal

<b>0</b>	Metal seal
<b>1</b>	Rubber seal

#### (C) Function

Nil	Standard (0.4 W)
<b>B</b>	High-speed response type (0.95 W)
<b>K</b> <small>Note 2</small>	High-pressure type (1.0 MPa, 0.95 W)
<b>N</b> <small>Note 3</small>	Negative common
<b>R</b> <small>Note 4</small>	External pilot

**Note 1** When two or more symbols are specified, indicate them alphabetically. However, combination of "B" and "K" is not possible.

**Note 2** Metal seal only

**Note 3** When "COM." is specified for the SI unit, select and mount the valve of negative common.

**Note 4** Dual 3-port is not applicable.

#### (D) Coil voltage

<b>5</b> <small>Note 1</small>	24 VDC
<b>6</b>	12 VDC

**Note 1** Only 24 VDC is available with the S kit.

#### (E) Light/surge voltage suppressor

Nil	Yes
<b>E</b> <small>Note 1, 2</small>	None (Non-polar)

**Note 1** Not applicable to the S kit.

**Note 2** A combination of "Function N (Negative common)" and "E" is unavailable.

Since "E" has no polarity, it can also be used as a negative common. Selection of "Function N" is not required.

#### (F) Manual override

**Nil:** Non-locking push type (Tool required)

**B:** Locking type (Tool required)

**C:** Locking type (Manual)

**D:** Slide locking type (Manual)

#### (G) CE/UKCA-compliant

<b>Nil</b>	—
<b>Q</b>	CE/UKCA-compliant

Refer to the standard product for specifications and dimensions.

# VQ1000/2000 Series

## Specific Product Precautions 1

Be sure to read this before handling the products.

Refer to page 8 for safety instructions and pages 9 to 15 for 3/4/5 port solenoid valve precautions.

### Light/Surge Voltage Suppressor

#### ⚠ Caution

The lighting positions are concentrated on one side for both single solenoid type and double solenoid type. In the double solenoid type, A side and B side energization are indicated by two colors which match the colors of the manual overrides.

### DC circuit diagram

#### Single solenoid

Note) A-side energization:  
A light (Orange) illuminates.  
B-side energization:  
B light (Green) illuminates.

#### Double solenoid

With wrong wiring prevention (stop diode) mechanism  
With a surge absorption (surge absorption diode) mechanism

### Continuous Duty

#### ⚠ Caution

If a valve is energized continuously for long periods of time, the rise in temperature due to heat-up of the coil assembly may cause a decline in solenoid valve performance, reduce service life, or have adverse effects on peripheral equipment. In particular, if three or more adjacent stations on the manifold are energized simultaneously for extended periods of time or if the valves on A side and B side are energized simultaneously for long periods of time, take special care as the temperature rise will be greater. In such cases, if it is possible to select a valve with a power-saving circuit, be sure to do so.

### UL Approved Product

#### ⚠ Caution

When conformity to UL is required, the product should be used with a UL1310 Class 2 power supply.

The product is a UL approved product only if it has a  mark on the body.

### Manual Override

#### ⚠ Warning

Without electric signals to the solenoid valve, the manual override is used for switching the main valve. Push type is standard. (Tool required) Locking type is semi-standard. (Tool required/Manual)

#### ■ Push type (Tool required)

Push down on the manual override with a small screwdriver, etc. until it stops. Release the screwdriver and the manual override will return.

#### ■ Locking type (Tool required) <Semi-standard>

Push down on the manual override with a flat head screwdriver until it stops. Turn it clockwise by 90° to lock it. Turn it counterclockwise to release it.

#### ■ Locking type (Manual) <Semi-standard>

Push down on the manual override with a small flat head screwdriver or with your fingers until it stops. Turn it clockwise by 90° to lock it. Turn it counterclockwise to release it.

#### ⚠ Caution

Do not apply excessive torque when turning the locking type manual override. (0.1 N·m or less)

# VQ1000/2000 Series

## Specific Product Precautions 2

Be sure to read this before handling the products.

Refer to page 8 for safety instructions and pages 9 to 15 for 3/4/5 port solenoid valve precautions.

### Manual Override

#### Warning

■ Slide locking type (Manual) <Semi-standard>

The manual override is locked by sliding it all the way to the pilot valve side (ON side) with a small flat head screwdriver or finger. Slide it to the fitting side (OFF side) to release it. In addition, it can also be used as a push type by using a screwdriver, etc., of  $\phi 1.7$  or less. ( $\phi 2$  or less for VQ2000).

### How to Mount/Remove Solenoid Valves

#### Caution

#### Removing

1. Loosen the clamp screw until it turns freely. (The screw is captive.)
2. Lift the coil side of the valve body while pressing down slightly on the screw head and remove it from the clamp bracket B. When the screw head cannot be pressed easily, gently press the area near the manual override of the valve.

### How to Mount/Remove Solenoid Valves

#### Caution

#### Mounting

1. Press down on the clamp screw. Clamp bracket A opens. Diagonally insert the hook on the valve end plate side into clamp B.
2. Press the valve body downward. (When the screw is released, it will be locked by clamp bracket A.)
3. Tighten the clamp screw. (Proper tightening torque: VQ1000, 0.25 to 0.35 N·m; VQ2000, 0.5 to 0.7 N·m.)

#### Caution

Dust on the sealing surface of the gasket or solenoid valve can cause air leakage.

### Replacement of Cylinder Port Fittings

#### Caution

The cylinder port fittings are a cassette for easy replacement. The fittings are blocked by a clip. Take out the clip with a flat head screwdriver, etc., then replace the fittings.

For mounting, insert the fitting assembly until it strikes against the inside wall and then insert the clip to the specified position.

Applicable tubing O.D.	Fitting assembly part no.	
	VQ1000	VQ2000
Applicable tubing $\phi 3.2$	VVQ1000-50A-C3	—
Applicable tubing $\phi 4$	VVQ1000-50A-C4	VVQ1000-51A-C4
Applicable tubing $\phi 6$	VVQ1000-50A-C6	VVQ1000-51A-C6
Applicable tubing $\phi 8$	—	VVQ1000-51A-C8

Applicable tubing $\phi 1/8"$	VVQ1000-50A-N1	—
Applicable tubing $\phi 5/32"$	VVQ1000-50A-N3	VVQ1000-51A-N3
Applicable tubing $\phi 1/4"$	VVQ1000-50A-N7	VVQ1000-51A-N7
Applicable tubing $\phi 5/16"$	—	VVQ1000-51A-N9

\* Refer to "Manifold Optional Parts" on pages 415, 416, 422 for other types of fittings.

#### Caution

1. Use caution that O-rings must be free from scratches and dust. Otherwise, air leakage may result.
2. After screwing in the fittings, mount the M5 fitting assembly on the manifold base. (Tightening torque: 0.8 to 1.2 N·m)
3. Purchasing order is available in units of 10 pieces.

# VQ1000/2000 Series Specific Product Precautions 3

Be sure to read this before handling the products.

Refer to page 8 for safety instructions and pages 9 to 15 for 3/4/5 port solenoid valve precautions.

## How to Mount/Remove DIN Rail

### ⚠ Caution

#### Removing

- Loosen the clamp screw on side (a) of the end plate on both sides.
- Lift side (a) of the manifold base and slide the end plate in the direction of (2) shown in the figure to remove.

#### Mounting

- Hook side (b) of the manifold base on the DIN rail.
- Press down side (a) and mount the end plate on the DIN rail. Tighten the clamp screw on side (a) of the end plate. (Proper tightening torque: VQ1000, 1.1 to 1.3 N·m; VQ2000, 1.4 to 1.6 N·m.)

## IP65 Enclosure

### ⚠ Caution

Wiring connection for models conforming to IP65 should also have enclosures equivalent to or of stricter than IP65.

## Built-in Silencer Element

### ⚠ Caution

A filter element is incorporated in the end plate on both sides of the manifold base. A dirty and choked element may reduce cylinder speed or cause malfunction. Clean or replace the dirty element.

#### Element Part No.

Type	Element part no.	
	VQ1000	VQ2000
Built-in silencer, direct exhaust	VVQ1000-82A-1	VVQ2000-82A-1

The minimum order quantity is 10 pcs.

Remove the cover from the top of the end plate and remove the old element with a flat head screwdriver, etc.

## How to Calculate Flow Rate

Refer to the **Web Catalog** for obtaining the flow rate.
